EXPERIENCE

Technical Designer & Unity Developer 📅 Dec 2024 – May 2026 Firescale Studios 📍 Castellon, Spain

- Developed a custom Unity plugin for an in-game **Cheat System**, empowering QA and Design teams to manipulate game states and reducing test turnaround by **95%**.
- Engineered internal tooling for Localization and **Addressables** asset organization, streamlining the development pipeline and cutting designer iteration time by **60%**.
- Architected a data-driven encounter design tool using ScriptableObjects, enabling level designers to balance combat scenarios independently from code.
- Authored technical documentation and established scalable gameplay systems for a 6-person team, ensuring stable weekly releases for *Rise of the Overlords*.

Unreal Developer 📅 Jan 2023 – Nov 2024 Catness Game Studios 📍 Castellon, Spain / Hybrid

- Engineered a scalable, modular networking architecture for a **100-player** battle-royale in UE5, maintaining <60ms RTT during 20-player stress tests.
- Migrated project from UE 5.1 to 5.3, profiling performance bottlenecks to yield a **+15% FPS gain** on mid-tier hardware.
- Integrated Ultra Dynamic Weather for fully synchronized weather cycles across clients.
- Designed and implemented a replicated, highly-modular inventory framework with drag-and-drop support, built for seamless integration by other developers.
- Ported *Sea Horizon* to **PS4, PS5, Xbox One/Series**, ensuring rigorous technical compliance and performance parity.

PROJECTS

Fractalia 📅 May 2025 – Nov 2025 Personal Project 📍 Unity, HLSL

- Created a systemic framework where players explore procedurally generated fractal spaces.
- Implemented custom **raymarching algorithms** in Unity shaders using HLSL to render complex geometries in real-time without relying on traditional polygonal workflows.

The Hidden Offering 📅 Nov 2024 Game Off Jam 📍 Unreal Engine 5, C++

- Created in 48 hours. Designed a systemic narrative-stealth experience.
- Handled gameplay scripting, visual logic, and systems integration using a clean mix of Blueprints and C++.

ABOUT ME

Technical Designer and Gameplay Programmer with a strong focus on tooling, system architecture, and pipeline optimization. Proven track record of building custom editor plugins that cut iteration times by up to 95%, and developing modular, network-ready systems for multiplayer environments. Passionate about empowering design teams and maintaining clean, scalable, and documented codebases.

TECHNICAL SKILLS

Engines

Unity Unreal Engine 5

Languages

C++ C# HLSL Python

Tools & Architecture

Tooling Editor Plugins Networking

Perforce Git Jira

Platforms

Windows PS4/PS5 Xbox Series Meta Quest

EDUCATION

BSc, Design and Development of Videogames

Universitat Jaume I
Sep 2019 – Jun 2023 Castellon

Software Engineering Concentration

Universitat Jaume I
Sep 2020 – Jun 2021 Castellon
